User's Manual

(Revision 1.4A)

CE FCC VCCI VIBRATION IP 65 TOUCH Wi-Fi FANLESS

Revision

Date	*Version*	*Description*
2020/07/24	Version 1.0A	Initial Release
2020/08/04	Version 1.1A	Correct section 2.5, System Status LED
2021/02/01	Version 1.2A	Add section 4, Yocto operating instructions
2021/03/08	Version 1.3A	At section 2.4, remove the CF/MicroSD cover as default
2021/09/15	Version 1.4A	Add Projected Capacitive Touch Solution

Safety Information

- Read these Safety instructions carefully.
- Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
- Do not expose your Panel PC to rain or moisture, in order to prevent shock and fire hazard.
- Keep PN8M-090T away from humidity.
- Do not open the cabinet to avoid electrical shock. Refer to your nearest dealer for qualified personnel servicing.
- Never touch un-insulated terminals or wire unless your power adaptor is disconnected.
- Locate your Panel PC as close as possible to the socket outline for easy access and to avoid force caused by entangling of your arms with surrounding cables from the Panel PC.
- USB connectors are not supplied with Limited Power Sources.
- If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient overvoltage.

DO NOT ATTEMPT TO OPEN OR TO DISASSEMBLE THE CHASSIS (ENCASING) OF THIS PRODUCT. PLEASE CONTACT YOUR DEALER FOR SERVICING FROM QUALIFIED TECHNICIAN.

(1) General Information

1.1 Product Description

PN8M-090T is an ultra-compact platform for the present demanding embedded and productive applications. It has NXP i.MX8M Mini Cortex-A53 ARM Quad Core which consumes only minimum power requirement when running at 1.6GHz, and up 4GB LPDDR4 memory provides faster data transfer rate. By using 9” TFT LCD, PN8M-090T becomes the perfect choice for a limited budget. In additional, the integrated Gigabit Ethernet port supplies the communication capability which makes PN8M-090T can be more widely used when running Yocto Linux and Android environments to become the perfect solution for system integration.

1.2 Product Specification

Table 1-1 Product Specification

CPU Board Specifications	
CPU	i.MX8M Mini-1.6GHz Cortex-A53 ARM Quad-Core
Cache	L2: 512KB Cache
Memory	1GB/2GB/4GB LPDDR4 onboard
Watchdog Timer	Support 3 Watchdog Timer
LAN	Integrated Gigabit Ethernet
Audio	High Definition Audio
Internal Drives	8GB / 16GB / 32GB / 64GB of eMMC onboard Micro SD slot (Like a card reader only)
I/O	RS-232 x 1 USB port (Ver2.0) x 2 RJ-45 Port x 1 Line-Out x 1
Mechanical & Environment	
Power Requirement	Single Voltage +5VDC (5A) Multi Voltage +8~+35VDC (8A)
Power Consumption	8W (Typ.)
Operating Temperature	0 ~ +60℃ (32 ~ +140℉) / -20~+70℃ (-4 ~ +158℉) Optional (-I)
Storage Temp.	-30 ~ +70℃ (14 ~ +158℉)
Operating Humidity	0% ~ 90% relative humidity, non-condensing
Dimensions	236.6 x 146 x 35mm (9.31 x 5.75 x 1.38 inches)
Weight	840g

Front Panel Protection	IP 65
Certification	CE / FCC / VCCI / Vibration / Shock
LCD Specifications	
Display Type	9” TFT LCD
Backlight Unit	LED
Display Resolution	1024(W) x 600(H)
Brightness (cd/m^2)	300 nits
Contrast Ratio	500 : 1
Display Color	262, 144
Active Area (mm)	196.61 (W) x 114.15 (H)
Viewing Angle	Vertical 120°, Horizontal 140°
Backlight Lifetime	20,000 hrs
Touchscreen	
Type1	Analog Resistive
Resolution	Continuous
Transmittance	80%
Controller	USB interface
Software Driver	Linux
Durability	1 million
Type2	Projected Capacitive Touch Screen **(Optional)**
Resolution	25ppi (Min.)
Transparency	86% ± 2%
Accuracy	Within 2.5mm each target
Surface Hardness	≧ 7H (Pressure： 0.5N/45°)

1.3 Inspection standard for TFT-LCD Panel

Table 1-2 Inspection Standard

</table>

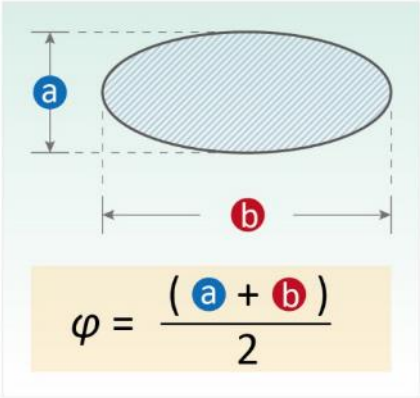
(1) One pixel consists of 3 sub-pixels, including R, G, and B dot.

(Sub-pixel = Dot)

(2) LITTLE BRIGHT DOT ACCEPTITABLE UNDER 6 % ND-Filter

(3) If require G0 grand (Total dot N≦0), please contact region sales.

[Note 1] W : Width[mm], L : Length[mm], N : Number, ϕ: Average Diameter.



1. White / Black Spot
2. Polarizer Bubble

Fig 1-1

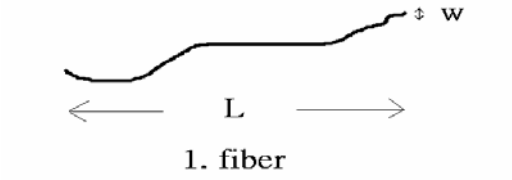


Fig 1-2

[Note 2] Bright dot is defined through 6% transmission ND Filter as following.

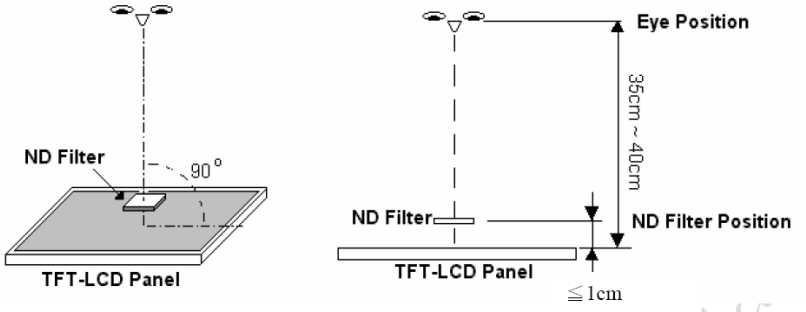

Fig 1-3

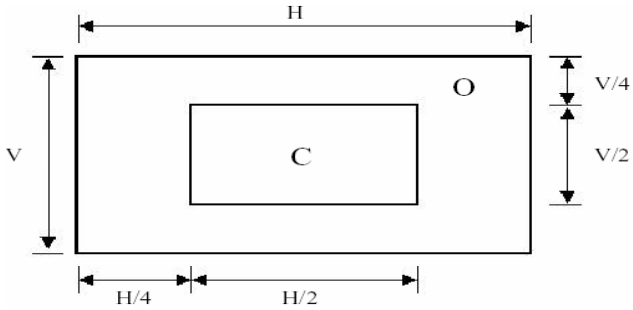
[Note 3]

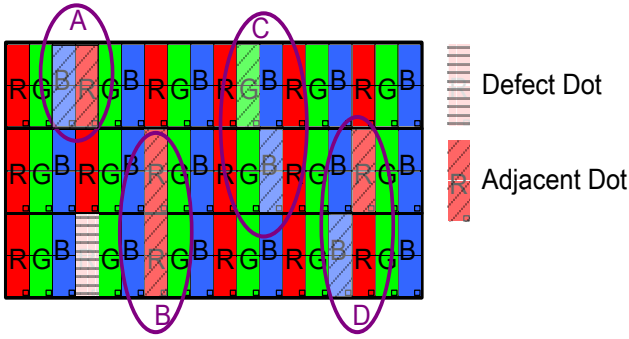


C Area: Center of display area

O Area: Outer of display area

[Note 4]

Judge defect dot and adjacent dot as following. Allow below (as A, B, C and D status) adjacent defect dots, including bright and dart adjacent dot. And they will be counted 2 defect dots in total quantity.



(1) The defects that are not defined above and considered to be problem shall be reviewed and discussed by both parties.

Defects on the Black Matrix, out of Display area, are not considered as a defect or counted.

[Note 5]

According to the technical information from LCD manufacturer, the image retention may happen on LCD display if the static image is kept for a period of time without any change. ICOP will suggest customers not to have static image on LCD for over 4 hours without any image movement and also enable screensaver to avoid image sticking issue if LCD displays need to be kept on for a long time.

Some Image retention issue will disappear when LCD display is turned off for a period of time, but some image retention may be not reversible when LCD encounters screen burn.

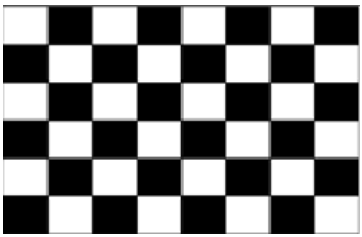
The following is LCD manufacturer's test result for customers' reference.

TEST ITEMS	CONDITIONS	NOTE
High Temperature Operation	70℃ ;240hrs	
High Temperature Storage	80℃ ; 240hrs	
High Temperature High Humidity Operation	60℃ ; 90%RH ;240hrs	No condensation
Low Temperature Operation	-20℃ ; 240hrs	Backlight unit always turn on
Low Temperature Storage	-30℃ ; 240hrs	
Thermal Shock	–30℃(0.5hr) ~ 80℃(0.5hr) ; 200 Cycles	
Image Sticking	25℃ ; 4hrs	**Note 5-1**
MTBF	20,000Hrs	

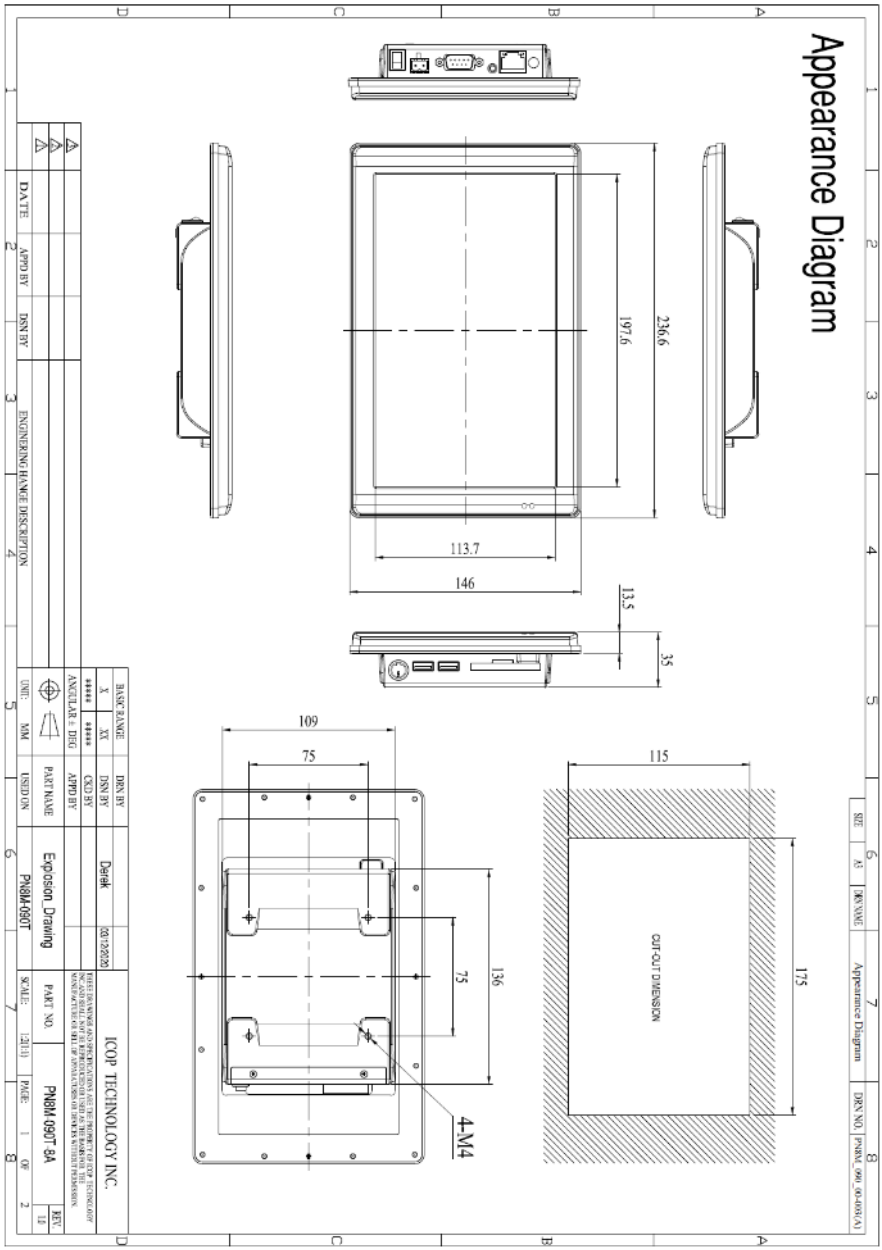
Note 5-1

1. Condition of Image Sticking test：25 ℃± 2 ℃.
2. Operation with test pattern sustained for 4 hrs, then change to gray pattern immediately.

3. After 5 mins, the mura must be disappeared completely.



1.4 Product Dimension



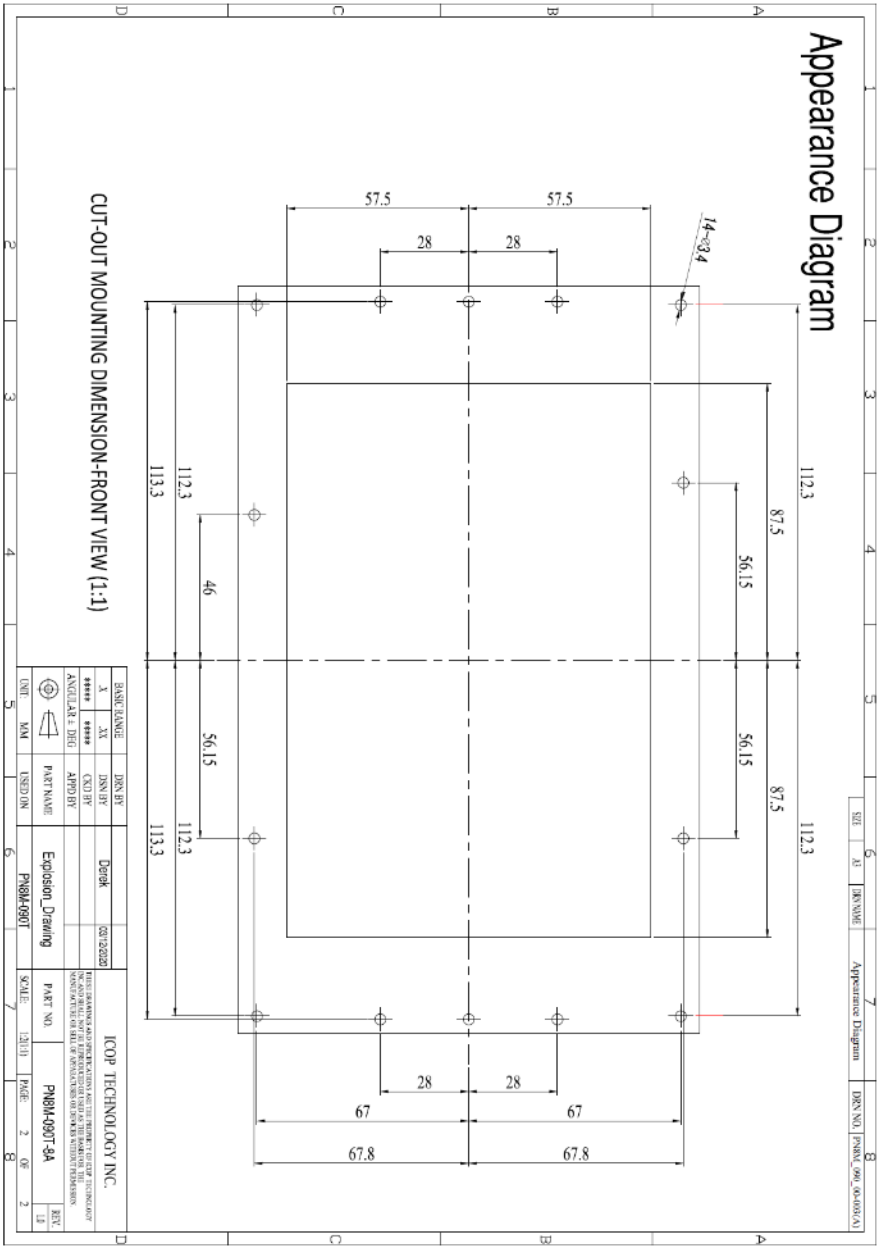


Fig 1-4 Product Dimension

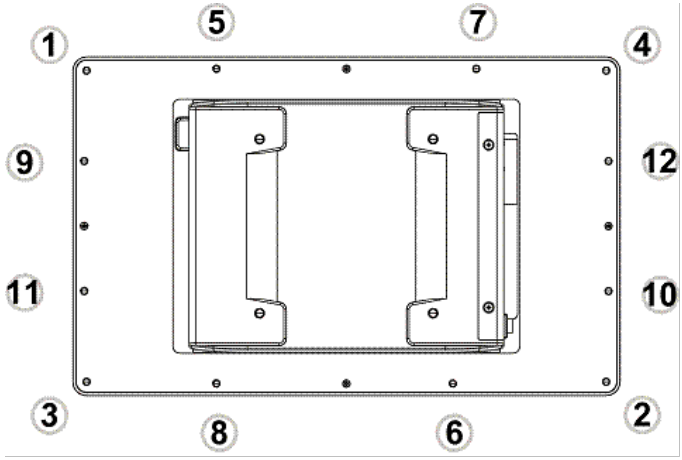
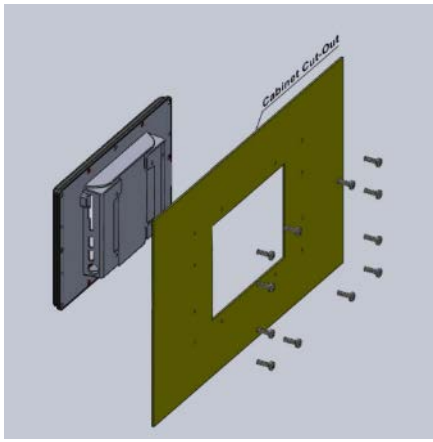
1.5 Panel Mounting Instruction

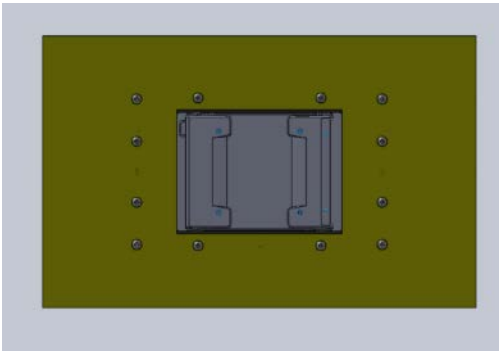
1. Cut a mounting hole in the panel. (Refer to PN8M-090T Dimensions on page 7) (Note 1)
2. Check and remove the twelve M3 screws in a diagonal pattern as image below if necessary.
3. Place PN8M-090T face-down on a clean, flat surface.
4. Slide the panel cutout around the back of PN8M-090T, until the panel rests directly on the gasket. Make sure the screw holes align with the screw holes on PN8M-090T.
5. The screw size is M3*L (L=wall thickness + 6.0mm) (Note 2)
6. Insert all twelve M3 screws into the screw holes. (Note 2)
7. Finger-tighten the M3 screws. Finish tightening the M3 screws in a diagonal pattern using an M3 screw driver (see the image as below); maximum torque 1.18Nm (12 kgf-cm).





Note 1:

It is strongly recommended that a professional machine shop cut the mounting hole in the panel.



Note 2:

The length for all twelve M3 screws will be according to the thickness of mounting panel. For example: The length of standard M3 screws for PN8M-090T is 6mm. If the thickness of your mounting panel is 3mm and washer thickness is 1mm, you have to use 10mm M3 screw.

1.6 Ordering Information

Product Code	LCD Size	DC-Input Type	BT&WLAN	DRAM	eMMC Capacity	eMMC Type	Wide Temp.
PN8M	090T	5A	N (No BT&WLAN)	4 (1GB)	F (8GB)	M (MLC)	I (Wide Temp.)
		8A	B (With BT&WLAN)	5 (2GB)	G (16GB)	S (SLC)

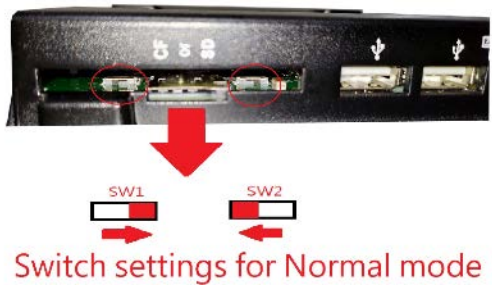
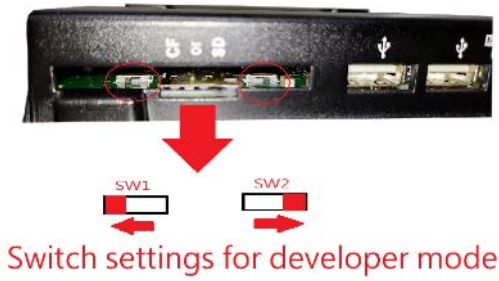
(3) The Settings for Normal and Developer Modes

1. There are two modes, Normal and Develop Modes as below.

Two switches setting for Normal mode, internal flash booting.



Two switches setting for Developer mode, which allow user to write the image in the eMMC.



2. **The software programming cable for Developer Mode.**

Ordering Part Number: CABLE-MINIDIN8P-30

(1) Please order this cable from ICOP.

(2) Refer section 3.2 to set two switches to be developer mode.

(3) Plug 8-pin male terminal.

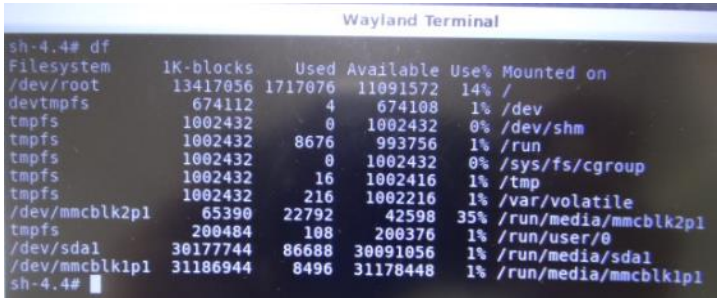
(4) Connect USB and serial console cables to your developer PC, and power on the system for system restore.

(4) Yocto operating instructions

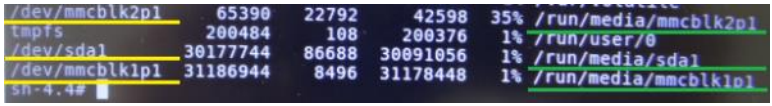
4.1 Check storages contents

(1) Boot up the unit and enter Yocto desktop, click upper-left icon to use weston-terminal.

(2) To check the storages status, execute “df”.



Under /dev/ directory, we found mmcblk1p1, mmcblk2p1 and sda1 three different storages.

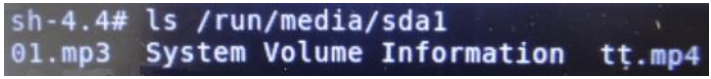


(3) To check the files, execute **command** ls with Mounted on directory

ls /run/media/mmcblk2p1

ls /run/media/mmcblk1p1

ls /run/media/sda1



After files checked, we found storage codes:

mmcblk1p1 = eMMC onboard with Yocto image

mmcblk2p1 = MicroSD card

sda1 = USB mass storage

4.2 Set the default time zone

(1) Boot up the unit and enter Yocto desktop, click upper-left icon to use weston-terminal.

(2) Input below command to get code list of default time zone in Yocto.

ls /usr/share/zoneinfo

(3) To change the time zone, execute command:

timedatectl set-timezone XXX

Note: XXX can be code in sub folder or main folder, for example:

timedatectl set-timezone ROC

*Input code with identical upper or lower case letters is necessary in Yocto command.

After time zone setup, Yocto will change system time automatically.

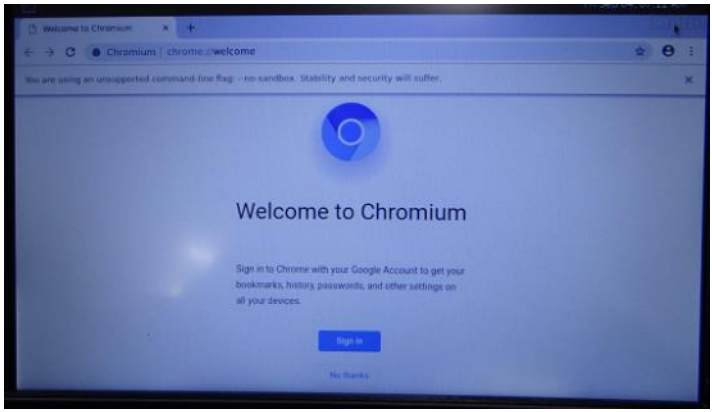
4.3 Open Chromium browser

(1) Boot up the unit and enter Yocto desktop, click upper-left icon to use weston-terminal.

(2) Execute **chromium --no-sandbox**.

```
sh-4.4# chromium --no-sandbox
```

(3) Set volume of sound.



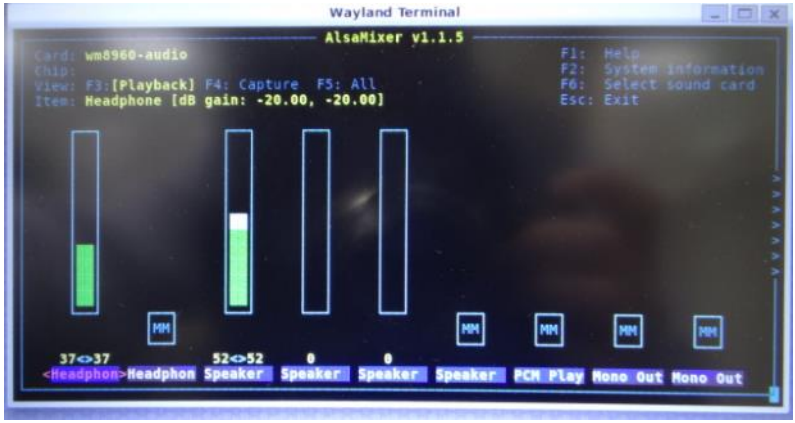
*In Chromium, NXP i.MX8M Mini processor doesn't support hardware decoder of video playback. Thus, suggest user to play the Full HD 1080P video by internal Yocto Player. Please refer the section 4.5 to play MP4 video directly.

4.4 Setup volume of sound

(1) Boot up the unit and enter Yocto desktop, click upper-left icon to use weston-terminal.

(2) Execute **alsamixer**.

(3) Set volume of sound.



4.5 Play MP4 video or MP3 music

(1) Boot up the unit and enter Yocto desktop, click upper-left icon to use weston-terminal.

(2) To play a MP4 video or MP3 music, execute **command**:

gst-launch-1.0 playbin uri=file:///run/media/XXX/XX.mp4 audio-sink=alsasink

gst-launch-1.0 playbin uri=file:///run/media/XXX/XX.mp3 audio-sink=alsasink

Note: XXX is file direction, for example:
